

# Top View Neon Flex Tube

## Features

- ※ SMD LEDs: SMD3528LED
- ※ LED Qty: 120 LEDs per meter / 144 LEDs per meter
- ※ Voltage: DC24V
- ※ IK Class: IK08
- ※ Waterproof Grade: IP68
- ※ The minimum bending diameter is 12cm.
- ※ Connection Length: 10M power at one end. 20M power at both ends
- ※ Material: PVC-Ivory White

## Application

The products are widely used in the illumination and decorative lighting for piazza, restaurants, private villas, garden, conference room, exhibition hall, beautify the area environment, stage bar, shopping mall, parking sculpture, the tourist attractions.

### 1 20pcs SMD/meter Neon Strip Parameters

Model No.	LED Type	LED Qty /meter (pcs)	Input voltage (V)	Power / meter (W)	Color	Tc(K)/nm	Beam Angle (degree)	SMD LEDs /Unit (pcs)	IP Rating	Cutting Length (cm)	Weight (Kg/m)
<b>FoliLED Flex-20T</b>	3528 SMD	120	24Vdc	9	Orange	600~610nm	120°	12.0	IP68	10.0	0.5
					Red	620~630nm					
					Green	510~525nm					
					Blue	455~470nm					
					Yellow	590~600nm					
					White	2600~2800K					
						2800~3200K					
4000~4500K											
5500~6000K											

### 1 44pcs SMD/meter Neon Strip Parameters

Model No.	LED Type	LED Qty /meter (pcs)	Input voltage (V)	Power / meter (W)	Color	Tc(K)/nm	Beam Angle (degree)	SMD LEDs /Unit (pcs)	IP Rating	Cutting Length (cm)	Weight (Kg/m)
<b>FoliLED Flex-44T</b>	3528 SMD	144	24Vdc	10	Orange	600~610nm	120°	12.0	IP68	8.3	0.5
					Red	620~630nm					
					Green	510~525nm					
					Blue	455~470nm					
					Yellow	590~600nm					
					White	2600~2800K					
						2800~3200K					
4000~4500K											
5500~6000K

## Dimensions (mm)

continuous length: 20M. power on both ends

## Aluminium Channel Drawing (mm)

Aluminum Mounting Clip  
Length: 5cm  
Holes: 2

Aluminum Mounting Channel  
Length: 100cm  
Holes: 2

Every meter of aluminum channel has 2 screw holes. The installation usually requires installing aluminum channel as the first step, and then insert the LED neon product to the channel.

Cutting Mark

Linear Installation

Curve Installation

## Precautions

### Detailed Installation Instruction

- Do not over extend the min. & max. bend radius.
- Although products do not generate a great amount of heat, it is recommended that you do not cover or conceal it.
- Do not puncture, cut, shorten or splice LED neon outside of the designated cutting marks.
- Do not route LED flex neon through walls, doors, windows, or building structures.
- Do not roll out LED flex neon on rough surfaces and over sharp corners. This will scratch the PVC optic.
- Do not use the product if outer PVC jacket is damaged, loose connections, or if the wire is visible without insulation.
- Do not secure the product with staples, nails, or like means that might damage the insulation or PVC material.
- Do not installed LED flex neon on/in places where it is subject to continuous flexing.
- Do not operate/run LED flex neon in temperatures exceeding 45C or 115F.
- Do not operate LED flex neon over the specified voltage or LED life degradation will be greatly increased.
- Do not leave any part of the LED flex neon unsecured. Movement over time from weather can cause damage from continuous movement.
- All led neon ip68 rated connectors must be assembled properly to obtain rating.
- Do not reverse polarity when connecting from both ends. This will damage the internal PCB board. Always test connections with your multi-meter.
- Do not energize LED flex neon in the reel package.
- LED flex neon can be cut only where marked. Look for "Dotted Line" or "Scissor Mark".
- Cutting outside of the specified mark will damage the light.
- \_Do not cut while the LED flex neon is connected with power.
